The methodology used to create these reports is explained in the [non-technical](#) and [technical](#) reports. The results are benchmarked against the results from trainees at a similar level of training in corresponding specialties, these are set out in the list of [benchmark groups](#). “Significant Change Indicators” (▲ or ▼) show a 95% significant change in the mean score for a unit and do not indicate a change in outcome.

Rows in italics and coloured blue contain aggregated 2017 to 2019 results.

The methodology used to create these reports is explained in the [non-technical](#) and [technical](#) reports. The results are benchmarked against the results from trainees at a similar level of training in corresponding specialties, these are set out in the list of [benchmark groups](#). “Significant Change Indicators” (▲ or ▼) show a 95% significant change in the mean score for a unit and do not indicate a change in outcome.

Rows in italics and coloured blue contain aggregated 2017 to 2019 results.

The methodology used to create these reports is explained in the [non-technical](#) and [technical](#) reports. The results are benchmarked against the results from trainees at a similar level of training in corresponding specialties, these are set out in the list of [benchmark groups](#). “Significant Change Indicators” (▲ or ▼) show a 95% significant change in the mean score for a unit and do not indicate a change in outcome.

Rows in italics and coloured blue contain aggregated 2017 to 2019 results.

The methodology used to create these reports is explained in the [non-technical](#) and [technical](#) reports. The results are benchmarked against the results from trainees at a similar level of training in corresponding specialties, these are set out in the list of [benchmark groups](#). “Significant Change Indicators” (▲ or ▼) show a 95% significant change in the mean score for a unit and do not indicate a change in outcome.

Rows in italics and coloured blue contain aggregated 2017 to 2019 results.

Green	Performing well for this indicator
Lime	Performing above average for this indicator
White	Performing is about average for this indicator
Pink	Performing below average for this indicator
Red	Performing poorly in this indicator
Grey	N<5
▲	Significant improvement in mean score since previous year
▼	Significant deterioration in mean score since previous year
—	No significant change in mean score
