Systematic review and meta-analysis course

In-Person | Tuesday 8th November 2022

Why attend this course?

This one-day course provides an introduction to the process of systematic review and meta-analysis. You will receive an overview of concepts and methodology, and guidance to support further learning. It is aimed at those early in their career with little or no research experience and there is no need to have previously performed a review. The course will be useful if you are planning or performing a systematic review, or to enable you to interpret published reviews.

Course Organisers

Dr Amanda Barugh (Edinburgh)

Dr Terry Quinn (Glasgow)

Dr Akila Visvanthan (Edinburgh)

Dr Rebecca Woodfield (Edinburgh)

Audience

Primarily early years' medical trainees (IMT2/IMT3/ST4) but suitable for anyone who wants to gain a basic understanding of this area.

What does the course cover?

- Introduction to systematic reviews
- Developing a research question
- Planning a literature search
- What to do after the search, including assessing risk of bias and presenting findings
- Introduction to meta-analysis
- Clinical applications (GRADE)

Format

The course consists of a mix of lectures, with interactive group work and informal discussion.

Registration fee

Standard Fee - £160

RCPE members - £109
