

2024 Advanced Coloproctology Course

20-21 March 2024

The ACPGBI Advanced Coloproctology Course has been successfully running for 30 years, and due to the positive feedback on the interactive online format, we are offering it once again in 2024.

ACC has a carefully planned programme to provide an update on current issues with an overview of the latest evidence whilst also aiming to provide practical tips and discussion. The programme is mapped to the ISCP curriculum to focus on the information needed for surgical trainees to pass their FRCS examination. The format of short presentations followed by panel discussions works well to keep those joining engaged.

Aimed at Colorectal Surgeons, Emergency General Surgeons, Colorectal Trainees, General Surgery Trainees, Gastroenterologists, Allied HCP anyone working in the multidisciplinary team looking for an update.

The course is available On Demand until we approach the 2025 course. The interactive features are only available for the live course, so we encourage live participation where possible.

Registration is free to lower/middle income countries and undergraduates.

Don't miss out on this opportunity to update your knowledge and skills.
