RCPE Edinburgh

Psychiatry for Medics

Friday 9 October

13:00 – 17:00

Online

Event info:

- Assessment, diagnoses management of altered mental state
- Adverse effects and toxidromes of commonly prescribed psychopharmacology
- Working with patients who have self-harmed or with suicidality
- Management of alcohol dependence and withdrawal in the inpatient setting
- The other side of the couch Q & A

This interactive half-day online course offers a practical and clinically focused update on managing acute psychiatric presentations in general medical settings. Bringing together experienced consultants across liaison, emergency, addiction, and general adult psychiatry, the programme covers key challenges such as altered mental state, psychopharmacology complications, self-harm, suicidality, and alcohol withdrawal.

Whether you're a consultant, resident doctor, GP, specialist nurse, or allied health professional, this course offers invaluable learning and networking opportunities for those working in the UK or worldwide.

Catch-up will be available to registered delegates for 28 days post event, and full details are on the website.
