Precision Care for Dementia: an update for physicians

Tuesday 10 November

13:00 – 17:00

Online

Join us for our exciting half day online course on Precision Care for Dementia. This will provide a practical and clinically focused update for physicians managing one of the most complex and growing challenges in modern healthcare. Covering the full patient journey—from diagnosis to acute care and treatment decisions—the programme brings together leading experts to explore advances in diagnostic techniques, including imaging and biomarkers, alongside real-world case discussions that translate theory into practice.

With dedicated sessions on:

- Matching patients to emerging therapies
- recognising and managing delirium
- Addressing psychological distress

This event equips clinicians with the knowledge and confidence to deliver more personalised, effective, and compassionate care for people living with dementia.

Whether you're a consultant, resident doctor, GP, specialist nurse, or allied health professional or student, this course is open to all who wish to increase their knowledge and skills in relation to dementia.

Catch-up will be available to registered delegates for 28 days post event, and full details are on the website.

CPD +3*
Credits

*3 CPD credits applied for.
