

10/11th Dec 2026

UKETS are pleased to announce their 2026/27 courses.

December 10th 2026: Basic Endovascular Skills (BES) is aimed at CT and early ST trainees who wish to start endovascular training in a simulated environment.

December 11th 2026: Novel Endovascular Therapies (NET) is a new course aimed at current endovascular practitioners who want to expand their expertise into new therapies such as atherectomy, thrombectomy and IVUS.

Spring 2027 – TBC: Angioplasty Essentials is another new course designed to take candidates on their journey between BES and NET. Learn to cross lesion, angioplasty and stent them using modern techniques and tools.
